

Mashatu's Cool New Pool

We are delighted to share the first photographs of the brand new swimming pool at Mashatu Lodge in Botswana. It's the new "hot spot" for gin and tonics under the African sun and cooling dips after an exhilarating morning drive. Situated on the outskirts of the camp, there is an added sense of privacy and exclusivity. Beautiful raised, wooden decking meanders past the bar (The Gin Trap) and leads to the rim flow pool. When cooling off in the pool, there is the illusion that the pool flows into the waterhole; an unfenced and elevated view of the animals drinking. Be sure to take a plunge next time you visit the Lodge! For more details visit their website on <http://mashatu.com>
