

The Blue Train – June 2021 update

The Blue Train has always been, and continues to be, a bucket list experience. It appears on people's aspirational wish list, their special birthday or anniversary list. The pandemic has enabled the team at The Blue Train to review the product and look at how it can be further enhanced. With this in mind, they carried out extensive upgrades to enhance the guest experience. These included completely replacing the water system and air-conditioning systems on board. In addition they carried out soft refurbishments onboard both train sets. This along with extensive training and adaptations to ensure that they were fully Covid compliant has meant that guests can now enjoy a completely refreshed train experience.

What better way to while away 46 hours than sitting with your loved ones, watching the stunning South African scenery gently pass by whilst sipping on your favourite tipple – mine continues to be a Pink Gin which goes rather nicely with a biltong snack.
